## ABOUT US

### Over 35 Years of Market Experience

Founded in 1987, Manhattan and Intellinet Network Solutions were one of the first European-owned cable companies in Taiwan.

### ISO 9001:2015 Certified

You can count on service and performance in accordance with ISO 9001:2015.

### Global Expertise, Local Mentality

With offices in North America, Europe and Asia, we're keen on international market needs and can swiftly overcome challenges on a global scale.

### Guaranteed Quality

Our In-house quality-control teams test each product before it's shipped to personally ensure the excellence that's synonymous with the Manhattan and Intellinet Network Solutions brands.

### Superior Warranty

To show our commitment to superior quality, we offer a 3-year-warranty on all active products and a lifetime warranty on almost all passive products.

### On-going Product Evolution

We are capturing unfiltered feedback, ideas and inspiration to improve and enhance product experience.

### One-Stop Shop

Manhattan and Intellinet Network Solutions are your comprehensive source for network and connectivity with more than 2000 products.

### Expert advice from people instead of chatbots

Our team creates customized solutions for your needs. From buying advice to tech support, you can rely on detailed industry and product knowledge.

Manhattan and Intellinet Network Solutions are two trusted connectivity and networking brands from ISO-certified manufacturer IC Intracom.

Our 35+ years of global market experience has resulted in a wide and growing range of products at competitive prices for installers, system integrators and resellers, with added value through high-standard product management in Germany.

Through OEM relationships and strategic partnerships in the IT channels, our products are available from more than 70,000 companies around the globe. We do this with enhanced features, simplicity, quality and performance at reasonable prices. We work hard to provide the right tools, so your customers can focus on what's important to them...and so can you.

We stand by our products with industry leading warranties that provide outstanding overall value. Our dedicated quality assurance team is located overseas and is responsible for thorough inspections to ensure products meet customer's expectations, specifications and quality standards. Our aim is to be your primary source for your product sourcing needs.

**Sealed protection against dust and water**

These IP55 cabinets are equipped even for challenging environment conditions. Their IP55-rated, powder coated steel housing is compliant with the IEC standard EN 60529 for safe protection against dust ingress and water jets from any direction. Sealed cable glands allow for cable entry. To ensure the neatly sealed design, the cabinet comes fully assembled, which also makes your installation quick and convenient.

## Space-saving hinged open frame wall racks

These wall mount open frames are a simple, cost-effective way for housing IT equipment in secure environments that don't require a lockable rack solution. They are a great fit in places where small rack solutions are often dispersed throughout an organization, like at a remote location or branch office. Their relatively compact design lets you place them out of the way on a desk or mount it on a wall instead of taking up floor space.

### 19" Wall Mount 2-Post Open Frame Network Rack

Hinged Swing Frame, 450 mm Depth, Flat Pack, Black RAL 9004

Maximum load capacity of 30 kg with frame closed or 10 kg with frame opened

Model #	U	Height (mm)	Width (mm)	Depth (mm)	Installation Depth (mm)	Shipment	Color
716178	6	360	500	450	400	Flatpack	Black
716185	9	493	500	450	400	Flatpack	Black

### Easy Access

The open frame design ensures maximum airflow to your equipment for smoother operation and a longer lifespan. It also allows your cabling to enter through all sides. A hinged front frame can be swung open for easy component exchange and maintenance. This construction makes it a smart choice as a test center rack for server and networking equipment.

### High-Quality Steel

The strong and durable housing, constructed of high-quality SPCC cold-rolled steel with antistatic powder coating, carries a load capacity up to 30 kg with the frame closed. Its flat-packed shipping condition saves you space and freight costs. The enclosure also saves you the expense of 20 rack screws and cage nuts to securely mount your equipment because it ships with them included.

**1U Tool-Free Rack Mount Clip, 12-Pack [716512]**

- Unique, innovative solution to quickly mount network accessories in a rack without tools or cage cut sets
- Easy to use by pressing the holders to secure equipment and pushing the button to release
- Great for installing 10" or 19" patch panels, PDUs, shelves, switches, blank panels, cable entry panels, & more
- Ideal for testing IT equipment with quick installation, removal, and repositioning in the rack
- Works with cantilever shelves up to ~ 300 mm depth and half-depth switches up to ~180 mm

**19" Plinths**

Organize cabling with cable feeds through the bottom of the cabinet, protect from dust and debris, stabilize free-standing cabinets, removable covers for cable openings.

## Cat6a Modular Plugs with Cat7 Raw Cable

The Best Performance for Your Network Infrastructure

### Why Cat6a Modular Plugs?

As there is no official, agreed-upon standard for the Cat7 plug, Intellinet Network Solutions uses the highest official TIA/EIA-approved components to give you the best specification available.

Cat 7 tested up to 600 MHz, 10G, LSZH, 24 AWG 100% copper, snag-free, gold-plated contacts

What is the difference between Cat5e, Cat6 and Cat6a?

The main differences between these categories lie in their speed, bandwidth, and performance over distance:

Feature	Cat5e	Cat6	Cat6a
Max. Speed	1 Gbps	10 Gbps (up to 55 m)	10 Gbps (up to 100 m)
Max. Bandwidth	100 MHz	250 MHz	500 MHz
Crosstalk Reduction	Low	Moderate	High
Best Use	Basic home networks, office setups, general internet usage	Faster data transfers, gaming, 4K/8K streaming, small business networks	Data centers, high-performance networks, future-proofing

## Where does the difference between CCA and pure copper matter?

The key differences between CCA (Copper-Clad Aluminum), and Pure Copper cables lie in conductivity, durability, cost, and signal performance:

### Pure Copper

- + Highly durable, resistant to breaking and corrosion
- + Best signal performance, with minimal resistance and low signal loss
- + Compliant with industry standards (e.g. TIA/EIA)
- + Reliable for Power over Ethernet (PoE) and long cable runs
- More expensive than CCA or CCS
- Heavier and less flexible than aluminum-based alternatives

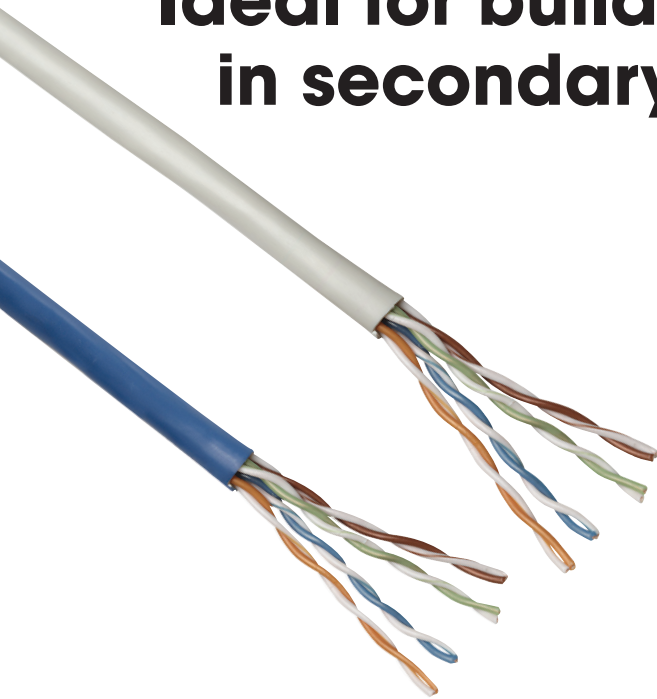

### CCA (Copper-Clad Aluminum), ~60-70% of copper's conductivity

- + Lighter and slightly more flexible than pure copper
- + Cost-saving
- Weaker signal strength over long distances
- Not ideal for PoE (Power over Ethernet), as aluminum heats up more and is less efficient
- More prone to breakage and damage due to aluminum's brittleness

## What does LSZH mean?

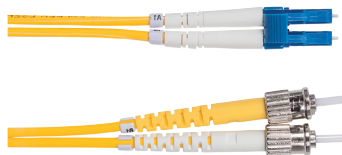

LSZH, sometimes spelled as LSOH or LSOH, stands for Low Smoke Zero Halogen. The complete lack of halogen in the cable jacket significantly reduces the release of toxic gases and vapors, should combustion ever occur. LSZH is frequently part of health and safety regulations applying to poorly aired spaces where it protects people and equipment.

## ENHANCED SECURITY.

It is impossible to remotely detect a signal being transmitted within a fiber cable. The only way to do so is by actually accessing the optical fiber itself. This makes fiber extremely attractive to governmental bodies, banks and other businesses with major security concerns.

## NO METALLIC COMPONENTS.

Fiber optic cable can be installed in areas with electromagnetic interference (EMI). This includes areas around utility lines, power-carrying lines and railroad tracks. Fiber is also ideal for areas of high lightning-strike incidence.

- Supports static and dynamic IP routing, MAC-based and IPv4/IPv6 IP-based ARP ACL
- Supports static and policy routing, RIP (Routing Information Protocol), OSPF (Open Shortest Path First) and VRRP (Virtual Router Redundancy Protocol)
- IGMP and MLD Snooping for multicast filtering

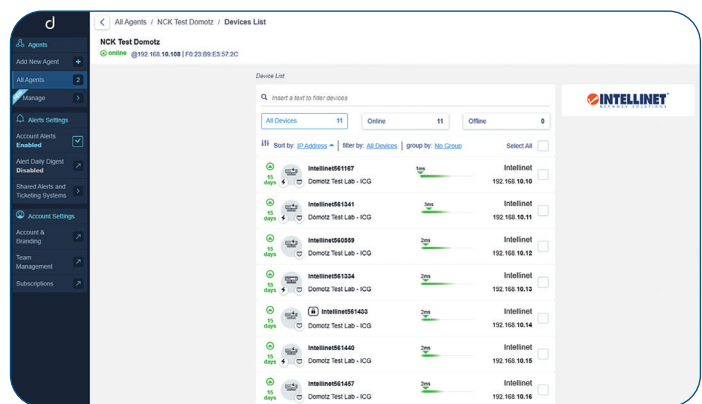

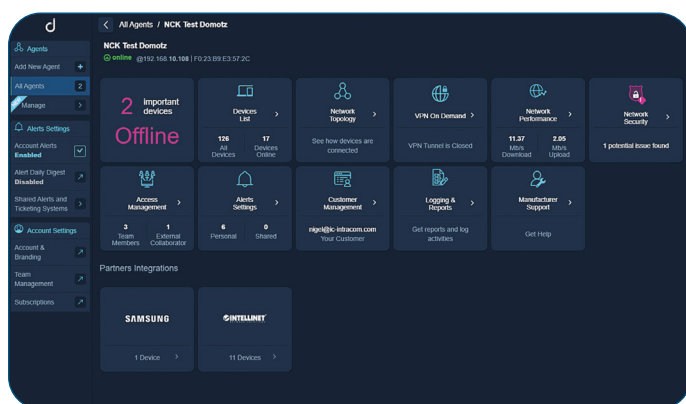

**Great networks need IT professionals, installers and integrators who can see and respond to what's happening at any time.**

**That's why our managed switches are now compatible with Domotz Pro**, the premier platform in Remote Network Monitoring and Management. Intellinet Network Solutions managed switches and Domotz help network professionals monitor and manage every endpoint to proactively prevent connectivity issues and solve problems in real time — anytime, anywhere.

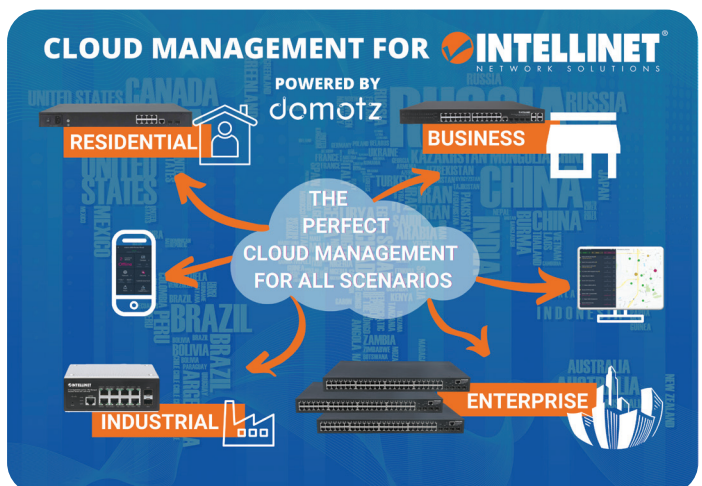

#### FEATURES:

- VPN on Demand, for troubleshooting and remote monitoring
- Secure remote connection via app or web
- Create customizable alerts for email and mobile devices
- Change device configurations and system programming
- Troubleshoot issues and resolve problems
- Power cycle devices and initiate reboots
- Complete maintenance and perform upgrades; and much more

## The benefits of DAC cables over fiber optic and RJ45 cables

The Direct Attach Copper (DAC) cable is becoming increasingly popular in the network industry. Our passive SFP+ and QSFP+ twinax cables are an energy-efficient, low-latency and cost-effective alternative to fiber optic and RJ45 cabling. It's an excellent choice for short-distance structured cabling between switches and routers on one end and servers or storage on the other, be it in Top of Rack (ToR), adjacent rack, stacking of 10GbE switches or similar applications.

### Close to zero power consumption and a wide temperature range

DAC is comprised of a twinax copper cable terminated with SFP+ or QSFP+ connectors on both ends, which can provide an electrical connection directly into active equipment. Consuming less than 0.15 W due to its thermal design, this passive cable helps decrease your operating expenses. Its zero-heat production during operation makes it more versatile and usable in wider temperature ranges up to 70°C (158°F), which is particularly valuable in data centers.

### Lower cost and simpler to deploy than fiber optics

DAC cabling has a relatively simple internal structure with fewer components than fiber cables. This cable structure helps lower the purchase price for applications in high-bandwidth data transmission and saves you from having to buy separate transceivers. This, in turn, makes DAC cables a lot simpler to deploy since there are fewer parts to match to complete setup. When you make upgrades or replacements to your network, the cable's seamless Hot Swapping capability makes quick work of connecting new equipment (note that passive DAC cables are not suitable for long-range applications; at 7 m, they reach their transmission limit).

### Lower latency than RJ45 twisted-pair patch cables

This Direct Attach Copper twinax cable supports data transfer rates up to 40 Gbps, and its unique structure and signal transmission offers lower latency.

### Compatible with Cisco, HPE and many more

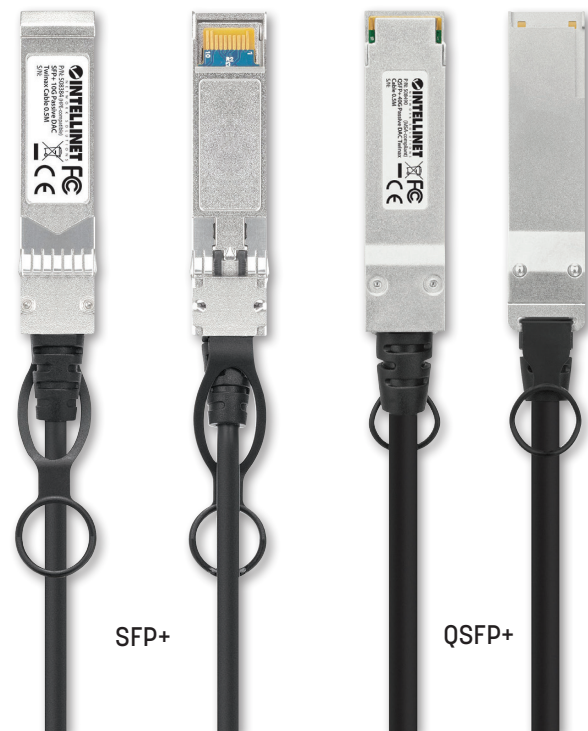

Our DAC twinax cables are either HPE- or MSA-compliant and therefore designed, programmed and tested to work with IntelNet Network Solutions, but also compatible switches and routers from Cisco, HPE, ZyXEL, TP-Link, Ubiquiti, D-Link and many more. For all compatible brands, please check [intellinetnetwork.eu](http://intellinetnetwork.eu).

### Gigabit PoE+ Splitter

**[560443]** Splits into RJ45 data and 5, 7.5, 9 or 12 V DC, IEEE 802.3at/af, Metal Housing

### Gigabit PoE++ Splitter with USB-C Output

**[561693]** One 45 W USB-C Port, RJ45 In and Out, IEEE 802.3bt/at/af, Plastic Housing

### Gigabit PoE+ Media Converter with PoE+ Injector

**[508209]** 1000Base-T RJ45 Port to 1000Base-LX (SC) Single-Mode, 20 km

### Gigabit PoE+ Media Converter with PoE+ Injector

**[508216]** 1 x 10/100/1000Base-T RJ45 Port to 1 x SFP Port

### Gigabit PoE+ Extender

**[560962]** Extends by 100 m, One 30 W Port, IEEE 802.3at/af, Metal Housing, Daisy-chain up to five PoE extenders for a distance of up to 600 m

### 2-Port Gigabit PoE+ Extender

**[561266]** Extends by 100 m, Power Budget 30 W, Two 30 W Ports, IEEE 802.3at/af, Metal Housing

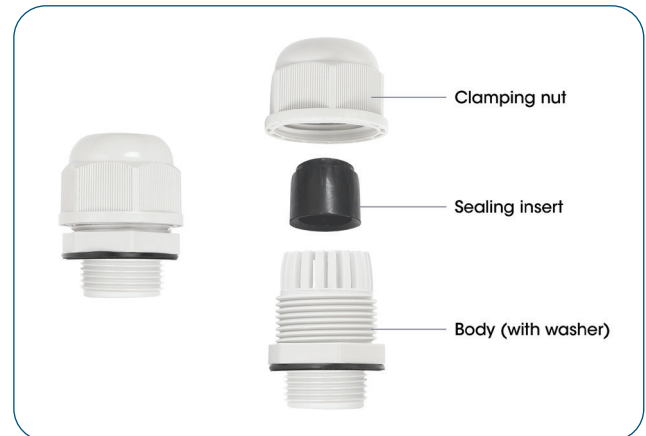

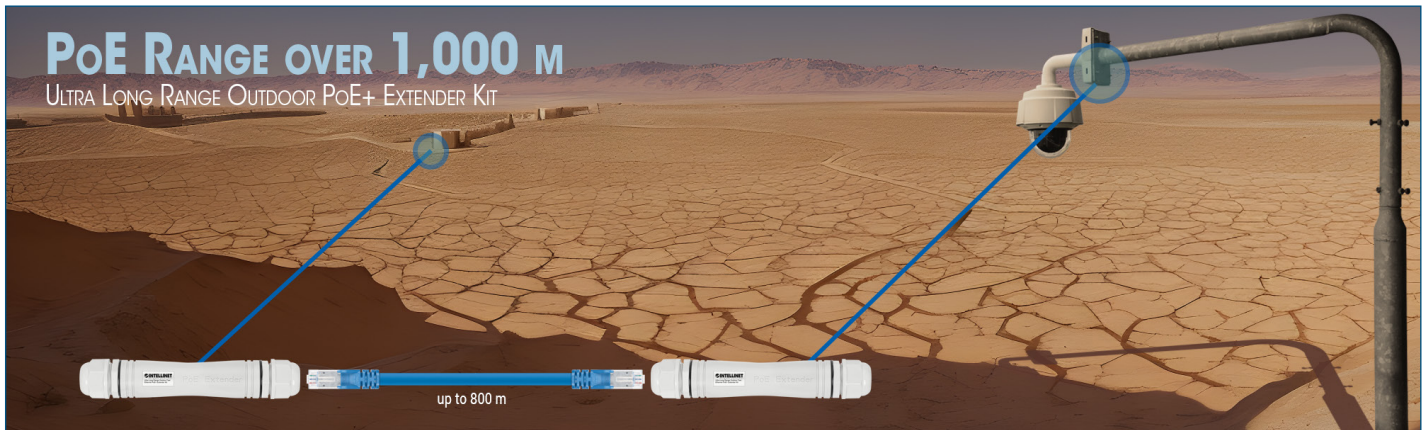

### Outdoor Gigabit PoE+ Extender

**[561211]** Extends by 100 m, One 30 W Port, IEEE 802.3at/af, IP65-rated Metal Housing, Daisy-chain up to four PoE extenders for a distance of up to 500 m

### Outdoor Vandalproof 2-Port Gigabit PoE++ Extender

**[561648]** Extends by 100 m, Power Budget 60 W, Two 30 W Ports, IEEE 802.3bt/at/af IP67 & IK10-rated Metal Housing

### Ultra Long Range Outdoor Fast Ethernet PoE+ Extender Kit

**[561952]** Extends PoE up to 1000 m, One PD Port up to 95 W, IEEE 802.3bt (4PPoE) Compatible, IP67 Waterproof and Dustproof, Set of Two Modules, Plastic Housing

- Extremely high PoE range and weatherproof housing ideal for IP camera installations
- IP67-rated, dustproof and waterproof
- Delivers data up to 1000 m without packet loss
- Kit includes two modules for maximum distance capabilities
- Compatible with IEEE 802.3bt/at/af-compliant powered devices (PD) such as network cameras, wireless access points, VoIP phones and more
- Supports 10/100 Mbps data rates
- Short-circuit, overload and high-voltage protection
- Requires no additional power supply; draws power directly from the PoE input
- Compatible with IEEE 802.3bt/at/af-compliant PoE injectors and PoE switches (PSE)
- Plug-and-play installation; no configuration required

### 2-Port Gigabit PoE++ Extender

**[561600]** Extends by 100 m, Power Budget 60 W, Two 30 W Ports, IEEE 802.3bt/at/af, Metal Housing

### 4-Port Gigabit PoE++ Extender

**[561617]** Extends by 100 m, Power Budget 90 W, Four 30 W Ports, IEEE 802.3bt/at/af, Metal Housing

# USB4 Cable for Next-Gen Connectivity

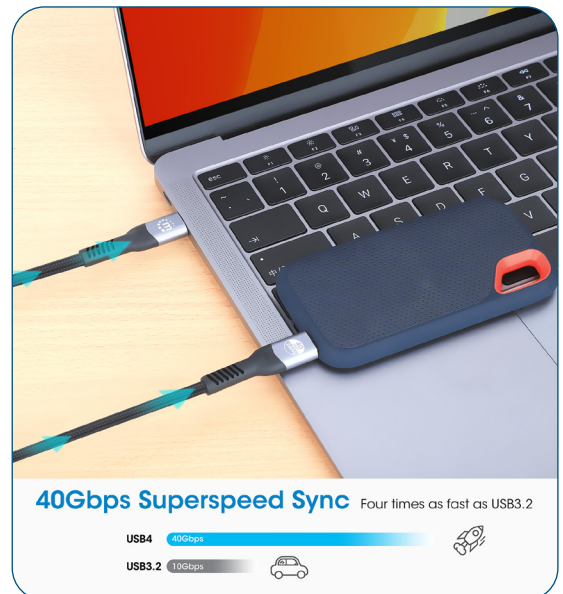

## USB4 Type-C 40 Gbps 8K Video and 240 W EPR Charging Cable / PD 3.1

[356374] 1 m

[356381] 2 m **NEW**

USB-C Male to USB-C Male, USB4 Gen 3x2, 8K@60Hz Single-Display / 4K@60Hz Dual-Display, Thunderbolt 4 Compatible, Power Delivery 3.1 Backward Compatible with 140/100/65 W

### Future-proof connection "USB 4.0"

This Manhattan USB4 Type-C Charging Cable is your future-proof connection for high-power USB chargers and laptops to come. It is compliant with the latest USB Power Delivery standard 3.1, which introduced Extended Power Range (EPR). Cables and devices with EPR support power up to 240 watts (48 V / 5 A).

### Superior wattage, backward compatible with older chargers

Such a superior wattage for USB-C has a lot of benefits: High-end devices like the latest 16" MacBook Pro® or a modern gaming laptop already take advantage of input power above 100 W, which they currently receive from a proprietary charging brick. Those bricks use custom DC tips that are not interchangeable between different brands. If you lose such a brick, it is frustrating and expensive to replace. The universal USB-C connector puts an end to that frustration, allowing Laptops from every manufacturer to be charged from any PD 3.1-compliant charger. This is also why a new EU regulation requires laptops to be chargeable via USB-C starting in 2026. PD 3.1 is backward compatible with PD 3.0, so you can still use your legacy chargers with 140, 100, 65 W or lower.

### Ultra-Fast 40G data transfer and 8K single-display or 4K dual-display resolution

Transfer movies, music, or an entire photo library quickly with 40 Gbps data transfer speeds on this cable. If you use it for video (e.g., with your docking station) it delivers images in brilliant 8K (7680 x 4320) at rapid 60 Hz or 4K UHD at blazing fast 144Hz with Dynamic HDR10 for perfect contrast and colors.
