GUESTGATE™ Internet Access Device

Provide Guests with Instant Internet Access While Keeping Your Network Secure.

Model
523240

Now you can easily accommodate guests in your offices, such as consultants, auditors, professional service providers, manufacturing representatives and clients, without burdening your IT administrator with last-minute LAN configuration requests. Simply install the INTELLINET NETWORK SOLUTIONS™ GUESTGATE™ Internet Access Device, and your visitors will be able to access the Internet from your conference room, offices or other accommodations in your facility, without compromising the security of your network.

Easy Access, Installation & Configuration

Using GUESTGATE, there is no longer a need for your visitors to “reconfigure” their notebook computers in order to access the Internet through your network – simply log in using the company-provided username and password. Nor is it necessary for your IP administrator to “reconfigure” your network every time you have a guest visit. GUESTGATE automatically adjusts to the guest computer’s TCP/IP settings, making it a snap for your IT organization to accommodate your guests who need to access the Internet. It also detects the host network’s setting, and in most cases automatically configures the Internet access!

Protect Your Private Network

Using the INTELLINET NETWORK SOLUTIONS proprietary HNP Technology™ (Host Network Protection), GUESTGATE prevents clients from seeing the host network, while at the same time allowing them access to the public Internet. Special privileges, such as access to specific servers and printers, can easily be configured as needed, while still providing host network protection. For added protection to your network, you can choose to assign your visitor a password and require it for access to the Internet. You can even limit the amount of bandwidth allowed to each client, further ensuring that your network is not impacted by your additional users.

Protect Your Guests’ Computers

Your visitors can rest assured that the security of their notebook computers will not be compromised by other “strangers”; i.e., other guests you may have visiting and accessing your network at the same time. This innovative device protects your GUESTGATE users by assigning different random networks to each client. This unique “client isolation” capability is provided through Layer 3 Virtual LAN technology, and ensures that no connection between guest computers can be established (even if they are connected via a wireless access point). And as if that were not enough, GUESTGATE also protects the guest computers from unauthorized access through the Internet, helping to prevent their computer from being attacked while connected to the Internet through your LAN.

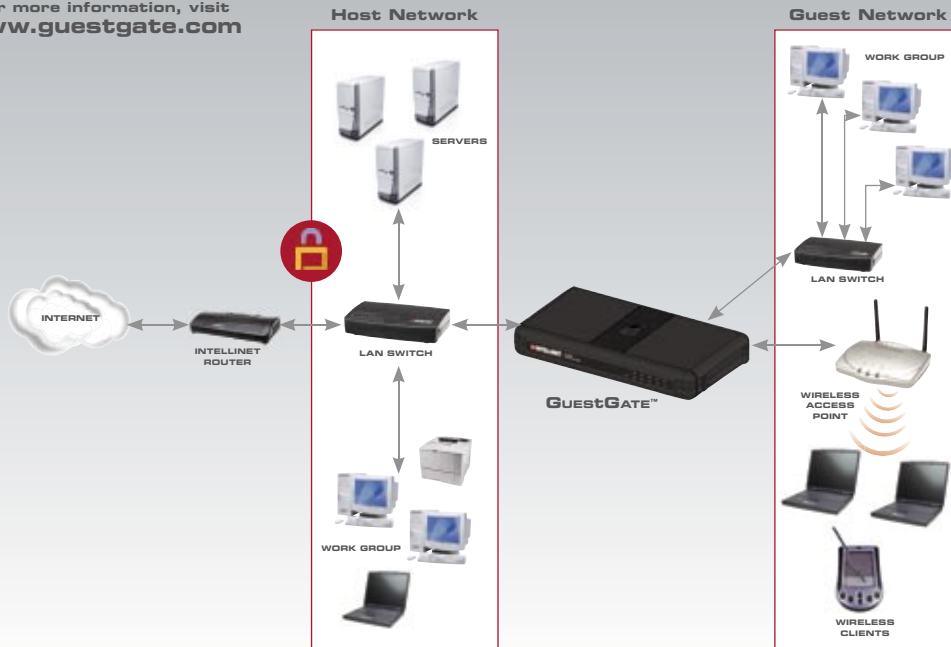

Provide a Professional Environment

GUESTGATE allows you to provide your own company welcome screen for your guests. Use the welcome screen feature to define terms and conditions, requiring your guests to agree before they proceed. This feature is optional and can be completely deactivated, if preferred.

Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all INTELLINET NETWORK SOLUTIONS products. All items carry a full Lifetime Warranty – the strongest quality commitment anyone can make.

LIFETIME
WARRANTY

Model
523240

Features

- Provides instant guest access to the public network
- HNP Technology protects the host network from guests
- IP Plug and Play for configuration-free client operation
- No configuration required; GUESTGATE automatically detects the network settings
- Additional setup functions can be performed by IT administrator using Web-based user interface
- Client isolation through Layer 3 VLAN technology
- Bandwidth control (upstream and downstream)
- Password option for Internet access
- Packet filter for IP addresses, domains and TCP/IP service ports
- Customizable welcome page (banner and text changeable)
- Firmware upgrade through Web-based user interface
- Plug and Play experience for your guests

Specifications

HARDWARE

- Guest Network: 4 x 10/100 Mbps RJ-45 Ports
- Host Network: 1 x 10/100 Mbps RJ-45 Port
- Reset Button
- LEDs: 1 x Power, 1 x Link/Activity for Host Network, 4 x Link/Activity for Guest Ports
- Dimensions: 1.8 (H) x 8.7 (W) x 4.7 (D) in. (45 x 220 x 120 mm)
- Humidity: 0 – 90% (Non-condensing)
- Temperature: 10° – 55°C (50° – 131°F)

POWER REQUIREMENTS

- 12 V DC / 0.5 A (external transformer included)

PACKAGE CONTENTS

- GUESTGATE Internet Access Device
- Power Adapter
- User Manual
