LOGIPIX CITY SURVEILLANCE

TODAY'S CHALLENGES

Safety of the citizens and the traffic in modern urban environments has become an increasingly crucial problem. Logipix has the contemporary answer for how to maintain security in the everyday city life. The prevention of crimes and offenses moreover fast reaction is the key to ensuring the safety of the citizens. The Logipix end-to-end video surveillance system has been designed specifically with this in mind.

MEET WITH ALL REQUIREMENTS

A wide range of individual IP cameras from Full HD to 150 megapixel resolution provides unrivaled image details and sharpness regardless of the light conditions. There can be day or night, shaded or low-light alleys, Logipix cameras always provide the required image quality. Large scale environments can be observed by a single device. The Logipix Panorama cameras take 100 or 150 megapixel resolution images on which faces can be easily identified even from far distances. Instead of using separate cameras with redundant areas the pictures are stitched together to create a single panoramic view.

EFFECTIVE VIDEO MANAGEMENT

The industry's most versatile video management software serves you to seamlessly control the system. Although the program has several functions, the software interface is still very simple and user-friendly thus valuable training time and costs can be saved on your side. Multiple Control Center client can operate in a citywide surveillance system at several workstations.

INTELLIGENT SOLUTIONS

Owing to the Video Content Analysis and other specific software functions traffic rule violations – eg.: red light violations and parking rule violations – can be captured and downloaded easily as probative video evidences.

SCALABLE SYSTEM

The flexible Logipix system is suitable to connect existing analog cameras as well, providing you the opportunity to build full IP based video systems. Depending on the budget you can use only analog cameras, one level forward integrating some high definition Logipix cameras or you can even use only multi-megapixel devices.

MORE MONEY IN THE POCKET WITH AN END-TO-END SYSTEM

A few Logipix cameras replace hundreds of analog devices, covering wider areas of the city. The industry's fastest NVR provides reliable and fail-safe recording. The versatile Control Center serves you to seamlessly control the system and react fast for the incidents. Although the program has several functions, the software interface is still very simple and user-friendly thus valuable training time and costs can be saved on your side.
