

Product: MxMC

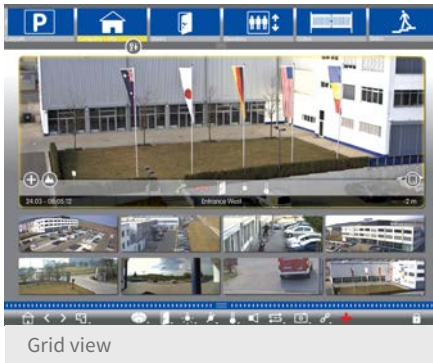

MOBOTIX Management Center MxMC

The New Standard in Professional Video Management

MOBOTIX

Intuitive Layout Views

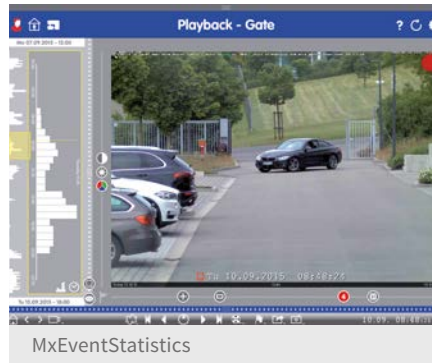

The MOBOTIX Management Center (MxMC) is a complete new development for PC/Mac systems with the focus on a unique and intuitive user experience, providing the highest cost savings and flexibility in the market. MxMC supports grid, graphic and info view as well as camera, group and alarm bar to receive faster overview and results.

Histogram with MxEventStatistics

The display of events in a Histogram allows a fast graphical analysis of irregularities and related information. This is a perfect tool to get a quick overview of all events from the database, generated inside the camera without any additional PC.

Flexible Video Export

MxMC allows the export of the complete video as an overview or the zoomed part of the image in different formats (mxf, avi etc.). This function supports the export into different resolutions, frame rates, virtual PTZ views, including the transformation from 360° hemispheric (fisheye) to surround,

panorama or special views independent from the export source.

User Action Log

MxMC supports a full logging functionality of user actions in order to establish a complete chain of evidence.

60-times High-Speed Playback

MxMC includes different research tools to provide faster results on events and recordings, comfortable research and in-depth analysis. 60-times high-speed playback with time lapse search reduces a **24-hour video footage down to nearly one minute** for example.

Playback Analysis • Post VM

Automatic post video motion analysis allows high-speed search including time lapse of the complete video footage to find particular motion events.

Perfect Overview with Tree Structure

The new device bar displays a new tree structure in all layout views and supports a clear

structure, an easier management with filtering of groups and the respective cameras by folding and unfolding branches. The size of the device bar can be adjusted individually and contains cameras and video clips. Definable favorites will provide direct access to frequently used cameras and groups.

No Limitations

MxMC can be used in projects independent of the number of cameras or the mix of products. It is possible to setup a complete system in the shortest time.

- **Gesture Control**
Touchscreen drag&drop interface
- **High-Speed Research**
60-times playback speed and comfortable time lapse
- **Event Statistics**
Frequency and cumulations with histogram
- **No Limits**
Unlimited cameras and users
- **Mobile Playback**
Adaptive bandwidth management
- **Layout-Devicebar**
Supports hierarchical layout views
