  For ticket printout format and login-page only, language support available in English/ German/ French/ Spanish/ Portuguese/ Italian languages

- **IP Plug and Play Internet Access**
  Zero configuration Internet access! Connect your office PC, laptop and handheld devices to the network without human intervention. It will automatically configure itself for the network

DESCRIPTION

With BYOD trend today, people need Wi-Fi access for their works, searches and their social life. Therefore, the HSP500 offers a robust and secure hotspot solution for the mini size venues to provide Internet service such as café/ pharmacy/ small store or shop.

The HSP500 support time-base and volume-base billing selection, so venues can set up their own billing methods by either letting the customers pay for the volume of downloads or usage time without worrying about insufficient bandwidth because HSP500 has already done a good job on allocating it!

The HSP500 becomes various small venues' favorite due to its productive Wi-Fi solution in different conditions. Combining a gateway and a printer into one device, HSP500 can be applied not only in fixed veneues,but also in mobile conditions such as buses ans yachts.

We also design a login pafe for veneues to key-in guests/visitors identity to fit the laws in some countries.According to the law,it requires venue owners to provide the guest's Internet usage records for tracking. Thus the HSP500 provides a Real-time session information and the remote site administrator could monitor the real time usage status via Session information page.

The HSP500 is one of unique innovation from Xentino, it's more than a simple Wi-Fi hotspot device; it's also equipped with IP Plug and Play technology so there's no need for end-users to change any settings in the their devices. It's fast, easy and trouble free to access Internet.

Furthermore, HSP500 also support QR code printout for mobile phone users who are disturbed by typing the accounts and pass words on the touch screens repeatedly. Convenience has become the first priority for people today. Hence, HSP500 has become one of the best Wi-Fi solutions for all small venues.
