

releasenote2500We_v257.txt

Release Notes for Vigor2500 router series Firmware
Firmware Version : v2.57
Released : Formal Release

Applied Models : Vigor2500, Vigor2500We

Note : The RST file will clear out all existing router settings back to factory defaults. You must use the RST file if you are experience unusual results after upgrading with the ALL file.

Do not then attempt to restore old settings from a backup file made with from previous firmware. After upgrading, please check that your web configurator shows the firmware version/build listed above.

multi-PVC support shall be referred to ISP services . You are recommended not to use this portion if your ISP did not support multi -PVC.

You are recommended to select "UBR" of QoS for internet Access if you only use one PVC to access internet .

[release]: the same firmware for annex A and B

- 1> "v2k5c257.xxx" is with Conexant modem code v3.27.
(recommended for annex A [POTS])
- 2> "v2k5o257.xxx" is with Conexant modem code v3.20.
(recommended for annex B [ISDN], Netherlands, Spain, and so on)
(or for annex A, China)
- 3> "v2k5a257.xxx" is with Conexant modem code v3.46.
(For Poland)
- 4> "v2k5u257.xxx" is with Conexant modem code v3.20.
(For Australia)
- 5> "v2k5v257.xxx" is with Conexant modem code v3.50.
(For Vietnam,
or Try this if you have sync problem on adsl .)
- 6> "v2k5s257.xxx" is with Conexant modem code v3.20.
(For US)
- 7> "v2k5n257.xxx" is with Conexant modem code v3.38.
(For Norway)

Notes:

- 1. Please select modulation to "MULTI" or "T1.413" when your adsl line was annex B (ADSL Over ISDN) and it only can work with Alcatel ETSI Mode .
- 2. Please try to use modem code v3.20 if you meet sync problem.

[1. Fixed problems]

- 1.1 Change MRU low to 1400 (Original 1492) to fit some ISP setting.
