Release Note for Vigor2960

Firmware Version: 1.0.5.1
Built Date: October 24, 2012
Applied Models:
Vigor2960

Vigor2960, a firewall broadband router with dual-WAN interface, can connect to xDSL/cable/VDSL2/Ethernet FTTx. The dual-WAN and 4-port gigabit LAN switch facilitates unified communication applications in business CO/remote site to handle large data from subscribed fatter pipe. The state-of-art routing feature, VPN security, and Dual-WAN provide integrated benefits for professional users and small offices.

New Features

- Support PPP mode for IPv6.
- Support domain name for IPSec/PPTP dial-out.
- Add time schedule for session limit and bandwidth limit..

Improvement

- Fixed: Web content filter (WCF) may not work well after running for a long time.
- Fixed: Data flow monitor may run out of system resource.
- Fixed: DHCP server cannot work when Multi-LANs is configured.
- Fixed: Hosts under routing LAN can not access into the router.
- Fixed: Configuration backup may fail.
- Fixed: UPnP does not work properly.
- Fixed: User management cannot work after changing default web port.
