

## Release Note for VigorAP 1000C

Firmware Version:	1.3.4
Release Type:	Normal
Applied Models:	VigorAP 1000C

VigorAP 1000C is a ceiling-mount Wi-Fi for business networks. As a tri-band AP, it provides an extra 5GHz Wireless band which increases the supported number of wireless devices. In Mesh mode or Range Extender mode, this extra band can also be dedicated as the Uplink band to the Internet. VigorAP 1000C is suitable to construct a small Wireless network.

### New Features

- Support Bonding.

### Improvement

- Improved: Allow Account/Password contain character "-".
- Improved: Refine Wireless Security options on web Wireless LAN >> Security.
- Improved: Support Mesh Preferred Uplink, Mesh Disconnect, and Mesh Reselect.
- Improved: Add Disable Reset Button option on web System Maintenance >> Management.
- Improved: In Mesh mode, shows web confirms when users are going to deactivate all available Wireless bands of Mesh.
- Corrected: An issue of wrong Mesh syslog.
- Corrected: An issue of display error on web Quick Start Wizard >> Operation Mode.
- Corrected: An issue of button error on web Mobile Device Management >> Station List.
- Corrected: An issue of failing to register to MyVigor if its MAC was a new MAC named at 14:49:BC.

### Known Issue

- System performance will drop when Bonding is enabled.

## Note

- The throughput figures are maximum, based on DrayTek internal testing with optimal conditions. The actual performance may vary depending on the different network conditions and applications activated.
