

Taipei, Taiwan, DynaColor is proud to announce the release of its latest IP Camera Model, DynaColor Hyper Mini Fisheye IP Camera. With its chic and compact outlook, the Hyper Mini Fisheye IP Camera provides the market a whole new experience of high quality 360° panoramic view with no blind spots and supports up to 12 Megapixels video streaming, offering a satisfying all-inclusive surveillance solution.

Featuring vandal resistant and weather proof design, DynaColor Hyper Mini Fisheye IP Camera is ideal for hard surface installation and ensures the stability of the camera. Flexible installation options are provided; users can choose either wall mount or ceiling mount installation in different locations such as offices, supermarkets, hotels, and vehicles.

DynaColor Hyper Mini Fisheye IP Camera is equipped with both front-end edge dewarping and back-end software dewarping technologies to provide various display modes. In quad view mode, the Hyper Mini Fisheye IP Camera is able to display four different view angles at the same time, and the digital PTZ function allows users to virtually pan/tilt/zoom the camera.

With IR LED module, DynaColor Hyper Mini Fisheye IP Camera is capable of capturing clear images in totally dark environments. With full-packed functions of image processing, high definition video encoding & compression technology and wide dynamic range function, DynaColor Hyper Mini Fisheye IP Camera is able to obtain forensic details in high contrast circumstances. What's more, its smart event functions possess great sensitivity of event detection and alarm trigger, providing reliable protections.
