

# Java View Version 0.3.7 Release Note

July 1st, 2009

## System requirements:

1. J2SE 1.5.0 runtime environment or above

## Supports:

1. Live monitoring
2. Playback monitoring
3. Event playback monitoring
4. Playback archiving
5. Event playback archiving
6. DRV file playback
7. Menu configuration
8. Dome control functions
9. Single Channel/ 2x2 / 3x3 / 4x4 display mode changing
10. Video zooming

## Limitations:

1. Since DVRJavaView is a pure java project, only I frame is decoded and displayed for H.264 / MPEG4 video.  
=> Bandwidth setting will influence the networking, for H.264/MPEG4 video, P/B frame will be dropped.
2. For menu configuration, no motion detection area setup is supported.
